

# Pre-surgery jitters? Shake them off with a pre-op tour!

Pre-op tours help children understand and become comfortable with what they will see, hear and feel on the day of their surgery.

Children will:

- Watch a short video explaining the surgery experience
- Visit a pre-op room where your child can touch and feel some of the equipment
- Meet a pediatric anesthesiologist to ask questions about your child's procedure
- Talk with a Certified Child Life Specialist, who is trained to help children understand and become more comfortable with medical experiences

**For children three through 12 years old.  
Mondays, 2 – 3 pm**

**Surgical Services Waiting Room, 2nd Floor Lakeside  
UMass Memorial – University Campus, 55 Lake Avenue North, Worcester**

To request a tour, contact our Child Life Program at 774-443-2549.

*UMass Memorial  
Children's Medical Center*
